

GEOCENT

Introduction to Agile & Scrum

Course Description

Introduction to Agile and Scrum answers the questions “What is agile?” and “How do I do Scrum?” The course explores the core values and principles that drive agile frameworks and provides participants with an in-depth understanding of how these are implemented in the Scrum framework. Additionally, the course provides an overview of Scrum roles, activities, and artifacts and how to begin executing Scrum in your work environment.

Intended Audience

Program Managers, Project Leads, Task Leads, and project team members who are interested in capturing the basics for implementing agile and Scrum.

Duration

1 day (8 hours)

What You Get

- Practical instruction in Scrum delivery
- Student Workbook and reference materials
- 8 hrs Professional Development Units (PDUs)
